University Project Portfolio – Decision Tree

Criteria Assessment: These criteria in the aggregate inform a decision to include or not include in the portfolio.

Alignment: Does the project align with one or more strategic or institutional goals of the University?

Scope Impact: Does the project have pan-institutional involvement, and/or interdependencies with other portfolio initiatives?

Complexity: Does it significantly change processes, integrations between systems, or require significant resources?

Impact: Does the project have significant value for students, faculty, and/or staff or required for compliance?

Project tracked at functional portfolio level
